

MB12N301

MID - BASS

Description The MB12N301 is a neodymium, high efficiency, 12" mid-bass. High sensitivity, excellent linearity and very high power handling capabilities. The magnetic structure is powered by a large neodymium magnet that provides an extremely high flux density in the gap. The new hyper-vented aluminium basket and magnetic assembly design provide an excellent heat dissipation and lower power compression. Special air-forced ventilations are provided for voice coil, magnet assembly and basket. M-roll surround and spider design offer great linearity and precise reproduction.

- Features**
- › 3.0-inch, fibreglass inside/outside copper voice coil
 - › 1000 Watt continuous program power handling
 - › 98.5dB Sensitivity
 - › 50Hz –3.0KHz Frequency range
 - › Dual-forced air ventilation for minimum power compression
 - › M-roll surround and exponential cone geometry

Part Number 11100071 MB12N301 8ohm
